- We have a proven track record of hosting successful events across the nation, from intimate gatherings to large-scale festivals and artist Silent Listening parties.

Mission Statement

- Our mission is to revolutionize the music experience by creating intimate, high-quality Silent Listening Events that bring artists and fans closer together.

THE PROBLEM

Traditional Album Release Events

- **Noise and Distractions**
 - Traditional album release parties often suffer from external noise and distractions, detracting from the music experience.
- **Limited Interaction**
 - Artists struggle to connect with their audience in a meaningful way due to the large and impersonal nature of typical events.
- **Overlapping Sounds**
 - Multiple acts or music sources can create overlapping sounds, leading to a less enjoyable experience for attendees.

THE SOLUTION

A Silent Listening Party is a unique event where an artist debuts their new music using wireless headphones provided by Urban Fetes. Unlike traditional listening parties, attendees use high-fidelity headphones to enjoy the music in an immersive and intimate setting. This format allows guests to experience the artist's new album without the distractions of external noise, creating a focused and personal connection with the music. The event typically includes opportunities for direct interaction with the artist, enhancing the overall experience and fostering a deeper connection between the artist and their fans.

Artist Silent Listening Parties
